Private Wells

Dakota County received a \$100,000 grant from the Minnesota Department of Health to provide no-cost water testing and financial assistance to well users with water quality issues.

The grant is available for eligible landowners using a private well as their primary drinking source.

Applicants must meet certain income criteria and have well water exceeding state guidelines for arsenic, manganese, nitrate, coliform bacteria or lead.

Septic Systems

Septic tanks need to be pumped at least once every three years to remove excess accumulation of sludge, grease and scum.

Two Tips to help your system:

- *Conserve water: Use water-efficient appliances, fix leaks, and spread-out water use throughout the day.*
- *Avoid harsh chemicals: Minimize use of bleach, detergents, soaps, and disinfectants.*
